Objective

To obtain a position as a Front End Web Developer that enables me to utilize my previous web development experience and gives me the ability to learn new technology on the job.

Experience

Front End Developer

January 2015 - Current

www.beforeudemo.com

Before U Demo is Chicagoland's leader in the reclaim and resale of used building materials, fixtures, appliances, cabinets, landscaping, and more. Implemented a Sketch design provided by the creative dept. into Wordpress using html and CSS, created custom homepage elements along with secondary page layout for sub pages along with WooCommerce to display products to users.

www.jewelerscenter.com

Created essentially an online mall for a jewelry complex. Implemented a vendor system for all the jewelers to upload 10 products unless they were a prime subscriber. WooCommerce was implemented to display set vendors inventory.

www.dolphins.com

Implemented the rebrand of a compound manufacturing company. Took the layout from the creative department and created the css and html. ACF integration was used for user view only functionality, custom theme php files were added to handle that added functionality.

www.spotteredu.com

Implemented the one page layout using JQuery, Html and css. Animation using JQuery and Css3 were used to give the page better effects when jumping up and down the page along with the header. This is a pure php page no CMS as it was not needed.

www.lgattorneys.com

Levin Ginsburg Attorneys is a Chicago based law firm. Design to their current website was developed by me. Approved design was then implemented into Wordpress. Custom home page was created along with secondary pages and blog.

Front End Developer

August 2009 - January 2015

Front End Developer

April 2007 - June 2009

Flash Developer

July 2005 - April 2007

Uxm Studio
